CAPTAIN

Vertical toilet roll holder with wet wipe dispenser

Designer **Anna Kovács**

PLIDESIGN

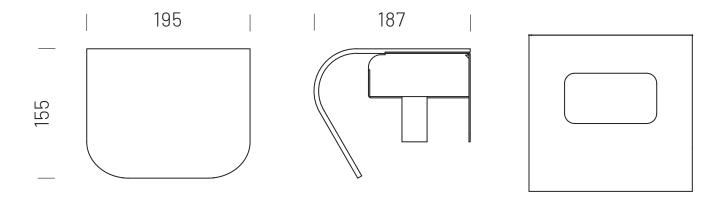

The CAPTAIN toilet roll dispenser upgrades the holder genre to a higher level. The holder is fixed parallel to the wall by the firm and sleek metal part, and the support bar stretching in the middle supports the effortless use of the paper roll. The toilet roll itself runs beneath the delicate curve of the plywood body. The smart design consists of a built-in wet wipe dispenser which discretely covers the package. The flat surface allows for keeping ornaments, tissues or aromatizers on the top, which serves also as a little shelf.

The holder can be tailored according to your taste - the metal parts are available in white and black, and the wooden surface in American walnut, European oak, and painted oak.

Dimensions:

 $195 \times 187 \times 155 \text{ mm} (L \times W \times H)$

Weight: 1,75 kg
