Plydesign

WE do *care*

Plydesign is a Hungarian furniture design established in 2014. Plydesign was born out of the desire to create excellent furniture design that contributes to people's well-being. Care, consciousness, and curiosity have been shaping the core of our design approach, where the fusion of technology and material makes our imaginations a reality—enhancing people's quality of life.

Tamás Babits, founder and CEO of Plydesign, and **András Kerékgyártó**, head of design, share the same holistic view — design, according to them, is not merely about creating objects. Still, it is a matter of deep understanding of social and personal context, therefore a physical answer for real everyday problems. With this mindset, Plydesign has successfully found a way to bring about an ecosystem where end-users, stakeholders, partners, employees, and team members equally find solutions for their needs.

Our achievements greatly rely on the high level of enthusiasm, prowess, and diligence of our partners. **Our family-owned factory** has gained a 30-year solid background of experience in manufacturing molded plywood components for renowned design brands. Plywood's versatile and flexible nature allows us to create contours following the body's shape, producing smaller amounts of waste and using less raw materials than solid wood. In addition, we choose wood only from FSC® certified sources. Plydesign products can be tailored to personal taste with OEKO-TEX® and EU Ecolabel certified textiles and fabrics by internationally acclaimed suppliers such as **Camira Fabrics** and **Gabriel** or highly resistant **Sørensen Leather**.

6

Expertise & *persistance*

Shipping & *set-up*

9

Plydesign offers a smooth solution for the whole journey of the pieces. The chairs and tables come flat packed and easily assembled to minimize the box's volume and lower the ecological footprint. Due to the smart design, the set-up of chairs and tables does not consume much time and nerve by following the manual included in the package.

FLEET

collection

To fully engage in an activity, we need a clear and peaceful mind – FLEET collection gives the level of comfort which allows users to experience flow when listening to music, enjoying dinner with family or friends, or concentrating on demanding intellectual tasks.

FLEET collection's name refers to the paradox of building a fleet in a landlocked country. A navy fleet alludes to the strength of a nation, in charge of different tasks to achieve. Our FLEET collection has a specific mission to accomplish: it has signed up as an advocate of good design through creating furniture with the optimum ergonomics. As for ships, the collection instead employs furniture design; as for munition, it relies on the importance of knowledge and spirit, enabling us to win actual everyday victories in the flow of resourcefulness and creativity.

Plydesign has developed a refined and subtle yet long-lasting product family encompassing accuracy, precision, and hidden details. FLEET collection results from extensive research and product development whereby the best ergonomics practices were integrated and applied, based on users' feedback. The product family offers the freedom of variability as the elements are designed in a universal way that the legs, tabletops, shells, and seat pans are compatible with each other. Plydesign products are equally well suited to contract and domestic environments as they fully comply with all the relevant standards for stability, safety, and surface resistance.

Seating

FRIGATE chairs

FRIGATE chairs

Designed by András Kerékgyártó

The FRIGATE family is considered as a strong design idiom which shows that responsible production and aesthetics can go hand in hand without any compromise in quality. The chair's shell consists of two components: the backrest is made with the aid of 3D-Veneer technology, while the seat pan is produced through conventional molded plywood process. The backrest, curved in all dimensions, provides ideal support for the waist, along with its upper part and seat pan where the edges are bent in the opposite direction of the body to avoid cutting into the back and the thighs. The combination of old and new technologies enables us to offer an optimal seating comfort as other seats made entirely with 3D-Veneer, while making it available for a much wider audience. The sublime silhouettes counterbalance the sturdy character of FRIGATE, which is designed to withstand the course of time. FRIGATE can be customized with a broad range of material and leg combinations (with swivel base, with swivel base and castors, stacking, height-adjustable) according to personal needs – literally a natural choice to brighten up intimate spaces or grand halls with the inviting feel of wood. FRIGATE chairs with sled base are stackable up to 20 pieces – for that purpose, a trolley with a handle is available to move it easily.

New product: Plydesign has implemented a new product development in the form of an elevated chair, which entails height-adjustable seat to find the ideal position, a footrest to improve circulation and blood flow as well as a starbase with five legs to ensure stability. FRIGATE shell is compatible with the starbase with five legs, in this way, its subtle elegance applies when sitting next to a counter.

AWARDS:

FLAGSHIP armchairs

FLAGSHIP armchairs

FLAGSHIP armchairs

Designed by András Kerékgyártó

FLAGSHIP armchair challenges contemporary furniture design by condensing the maximum comfort and timeless, fine appearance in a solid structure. FLAGSHIP is a new take on the classic genre of the armchair. The seat shell gently embraces the body, providing sufficient support for the lumbar region, arms can be rested on a delicate lift at a perfect height, and the curved edges on the seat pan as well as on the back follow the lines of the thighs and back softly without cutting into them. The armrest and backrest form an inherent unity with the upholstery which conforms seamlessly to the composition.

A wealth of possibilities is at disposal when it comes to stylistic preferences – bases, legs (with swivel base, with swivel base and castors, stacking, height-adjustable) and shells are freely able to be combined as the joints of each part are compatible with each other. FLAGSHIP is well suited to small, cozy milieu as well as to offices or restaurants thanks to its warm, welcoming delicacy.

New product: Plydesign has implemented a new product development in the form of an elevated chair, which entails height-adjustable seat to find the ideal position, a footrest to improve circulation and blood flow as well as a starbase with five legs to ensure stability. FLAGSHIP shell is matching this type of leg, giving a splendid allude to the act of sitting at a bar or a counter.

PATROL chairs

Designed by András Kerékgyártó

The PATROL chair is an economical alternative, offering a high level of flexibility and durability for its value. The set-up of the chair is simple: legs are held to the shell by 4-8 screws and are easily detachable for economical transport. The robust, 5-point mounting system reduces the torsional forces on the plywood X-legs.

PATROL chairs with sled base are stackable up to 20 pieces – for that purpose, a trolley with a handle is available to move them easily.

KORVET barstools & KORVET JR. stool

KORVET barstools

Designed by András Kerékgyártó

KORVET family provides an elegant lift in any circumstances – barstools in two sizes guarantee the impeccable experience whether in a café, bar, or at the counter in a modern kitchen. Now this range is completed by the KORVET stool, which suits the standard table heights. Therefore, it provides the possibility of tailoring any interior in harmonious unity with the KORVET stools covering all the possible heights and scenarios.

Tables

SUBMARINE coffee tables

A coffee table plays an essential role in the living room – a display for our art albums, candles, or treasured ceramic bowl filled with flavourful fruits. SUBMARINE with round or oval tabletop becomes a partner to the sofa or even to a FLAGSHIP armchair where we spend a cozy afternoon with our readings and a cup of tea at arm's length.

The SUBMARINE two-piece coffee table set provides a space-saving solution as the small table can slide under the other. By nesting the small table underneath the larger one, we can expand the surface at our disposal. The minimalistic and sleek design combined with the warmth of wood welcomes guests in an enticing and alluring way in any living room.

MOTHERSHIP tea tables

MOTHERSHIP *tea tables*

Designed by András Kerékgyártó

Teatablesmayentailmanyfunctions—a furniture piece representing a quiet corner with familiar and aesthetic objects such as a table lamp, a vase with fresh flowers or the favorite diary with thoughts and creative writings inside. The MOTHERSHIP tea table is an elegant pedestal for light dinner servings, adapting to different kinds of spaces due to its wide range of available shapes and sizes.

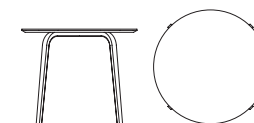

Slowing down, having a cup of coffee or tea paired with a cookie and reading a magazine is a perfect way to relax. MOTHERSHIP tea table with metal base is a synergy of French bistro ambiance and Scandinavian type of self-care. A visual and physical break spending with yourself or engaging in a meaningful conversation with a friend.

The tea tables come in two sizes, both with round and square tabletop. They are lightweight but also very stable and sturdy at the same time.

ROTHERSHIP dining tables

MOTHERSHIP dining tables

Designed by András Kerékgyártó

The MOTHERSHIP dining table promotes nothing more than what it offers: simple tenacity and sublime hospitality. MOTHERSHIP displays openly the beauty and character of wood abstaining from any ornament which would distract the attention. Standing alone, or wrapped around by seated people, MOTHERSHIP remains a calming reference point in space, whether it is about connecting family and friends during lively dinners, unpacking groceries, or picking up your unfinished book or magazine.

Due to its minimalistic design, MOTHERSHIP dining table works perfectly in most interior styles. To enhance ambience and accentuate on maximum comfort, FLAGSHIP armchairs are recommended for larger type of MOTHERSHIP dining table (1600x900).

PARTNERSHIP conference table

PARTNERSHIP conference table

Designed by András Kerékgyártó

There are many different ways to make an impression – the invisible dynamics enter in motion when someone steps into a meeting room. PARTNERSHIP evokes quiet confidence, which can serve as a foundation of ambiance in every meeting. The classic aesthetics, stringent lines, and the smooth surface revealing the woodgrains are soothing to the eye.

A sophisticated platform for presentations or meetings with the opportunity of built-in electrical outlets. PARTNERSHIP, due to its large size and central aluminium bases can accommodate up to 8 FLAGSHIP armchairs.

ADMIRAL boardroom table

ADMIRAL modular boardroom table

The large table's modular structure and stability are made possible by a concealed metal structure to which a veneered layer is fixed. The table consists of three parts joined by metal elements folded under the bolt when used separately to avoid losing them and prevent them from swinging in vain. The metal legs are also covered with solid wood. Disassembling the legs allows smooth shipping and an economical, smaller size of the box.

Admiral bespoke modular boardroom table
4300 × 1290 × 745 mm (L × W × H)

WAVE

collection

We care about every little detail when it comes to interior design. That is why Plydesign launches the WAVE collection, representing a range of paper holders improving our everyday life in the kitchen, bathroom, and living room. The paper holder family has been developed to a high aesthetic and functional standard to help organize your space.

The WAVE collection was born in the frame of PLY DESIGN HOUSE incubation program, which was launched in 2021. By establishing the design competition, Plydesign encourages the bloom of the national design and wood industry and aims to increase its international position on the global market. The competition seeks to transfer knowledge and bring about a platform where young talents can show their prowess and inventiveness. In this way, Anna Kovács junior designer received the opportunity to elaborate her design concept in a six-month career training program. She developed a ready for mass production collection that proved to be a niche product range on the market.

The WAVE collection exploits plywood's versatile nature by complying with the peculiarity of the manufacturing process. The whole product family is based on a single mould that defines the remarkable design for the entire collection. Due to the previously conducted meticulous market research, the roll and tissue holders are compatible in size with most paper brands.

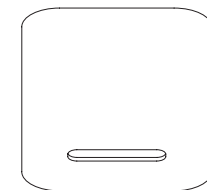

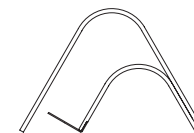

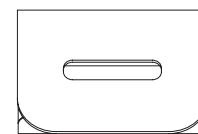

CADET tissue holder

Designed by Anna Kovács

Nowadays, tissue boxes are entirely made of paper which is highly praiseworthy in terms of sustainability and recycling.

The CADET dispenser prevents the tissue box from any unfortunate spillage and soaking as the plywood body embraces it, and the metal retaining bracket keeps it above the tabletop. Compared to peer tissue dispensers, CADET offers a more comfortable use due to the slantwise position of the aperture. The curvy shape of CADET tissue dispenser makes a cohesive look with the other members of the WAVE collection.

CADET tissue dispenser
252 × 243 × 164 mm (L × W × H)

PILOT kitchen roll and napkin holder family

Designed by Anna Kovács

The **PILOT paper holder family** surpasses our expectations by fulfilling several essential functions at the same time, as well as remaining a stylish home décor piece. These holders support our dynamic contemporary lifestyle to organize our space in an efficient way, featuring a minimalist design with the natural warmth of wood or with enticing plain colour depending on the preferences.

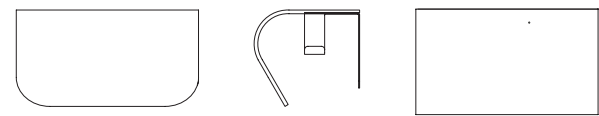

The **PILOT kitchen roll holder and tablet stand** in our arm's reach prevent the chaos in the kitchen when we juggle between activities and remain an eye-soothing and elegant design object on the kitchen worktop. A kitchen roll is indispensable in every home – the PILOT holder provides a solution to keeping the kitchen worktop tidy while we follow the steps of a new recipe that appears on the tablet's screen.

The **PILOT kitchen roll holder** can be easily mounted on the wall where we need it the most. The roll runs beneath the soft lines of the plywood body, saving it from any spillage. The support bar stretches in the middle, allowing the paper roll's effortless use.

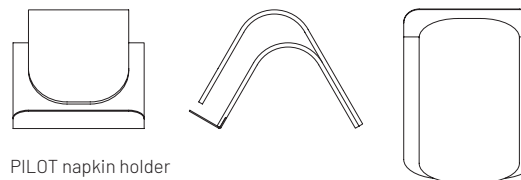

Even the tiniest elements can have a significant impact on visual harmony. The **PILOT napkin holder** humbly offers serviettes on the dining table while its soft, wavy lines attract attention. Depending on your preferences, we offer a wide range of colours embracing the warmth of the American walnut, European oak or the playful tones of claret, blue, green and peach. The metal parts are available in black and hite.

CAPTAIN

toilet roll holder family

Designed by Anna Kovács

The **CAPTAIN toilet roll holder family** shares the same functions in different sizes, so they fit any kind of bathroom. The holder is fixed parallel to the wall by the firm and sleek metal part, and the support bar stretching in the middle supports the effortless use of the paper roll. The toilet roll itself runs beneath the delicate curve of the plywood body. The flat surface allows for keeping ornaments, tissues or aromatisers on the top, which serves also as a little shelf. The horizontally extended version consists of a built-in wet wipe dispenser which discretely covers the package. The holders can be tailored according to your taste - the metal parts are available in white and black, and the wooden surface in American walnut, European oak, and painted oak.

CAPTAIN vertical toilet roll and wet wipes holder
195 × 187 × 155 mm (L × W × H)

CAPTAIN horizontal toilet roll and wet wipes holder

Lamps

SILURUS-PLY lamp

Designed by Ramón Nieto

Professional LED lighting fixture for both ceiling and suspended ceilings. It has excellent reflection; direct, indirect, or an indirect radiant version. The lamp's body is made of plywood which brings warmth and nature into any space. The SILURUS-PLY lamp is available both in American walnut and European oak.

Features:

Modul Flux: 3440 lm
Indirect: 860 lm
Color Temperature: 3000 K
Color Rendering Index >80
System Power Direct: 32 W
Power Supply: 230 V, 50 Hz

Optical system:

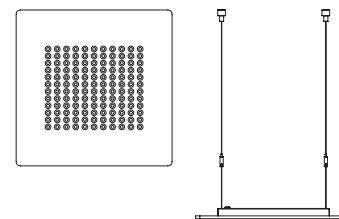

Lifetime: 50000 hours (L-70)
Lightsource: Osram LED modul

Options:

Color Temperature: 4000 K
Dimming: 1-10 V, DALI
Smartphone - Bluetooth

Structure:

Passive cooling
Milled plywood
Protection: IP20

Silurus-Ply lamp
400 x 400 x max. 900 mm (LxWxH)

SHELFORDII-PLY lamp

Designed by Ramón Nieto

Inspired by nature, SHELFORDII-PLY has a biomorphic form with the calming effect of wood. The central body consists of the luminaire, which emits a warm hue with the aid of LED supported by an integrated Bluetooth system. The American walnut or European oak plywood petals are fixed around the luminaire – this way, they serve as a diffuser and prevent eyesores caused by direct light.

Features:

Modul Flux: 4950 lm
Color Temperature: 2700 K
Color Rendering Index >90
System Power Direct: 65 W
Power Supply: 230 V, 50 Hz

Optical system:

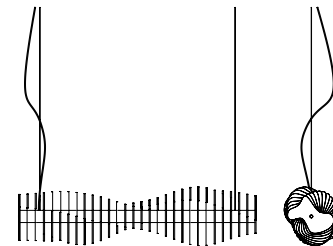

Lifetime: 50000 hours (L-70)
Lightsource: Osram LED modul

Options:

Color Temperature: 3000, 4000 K
Dimming: 1-10 V, DALI
