Tissue dispenser

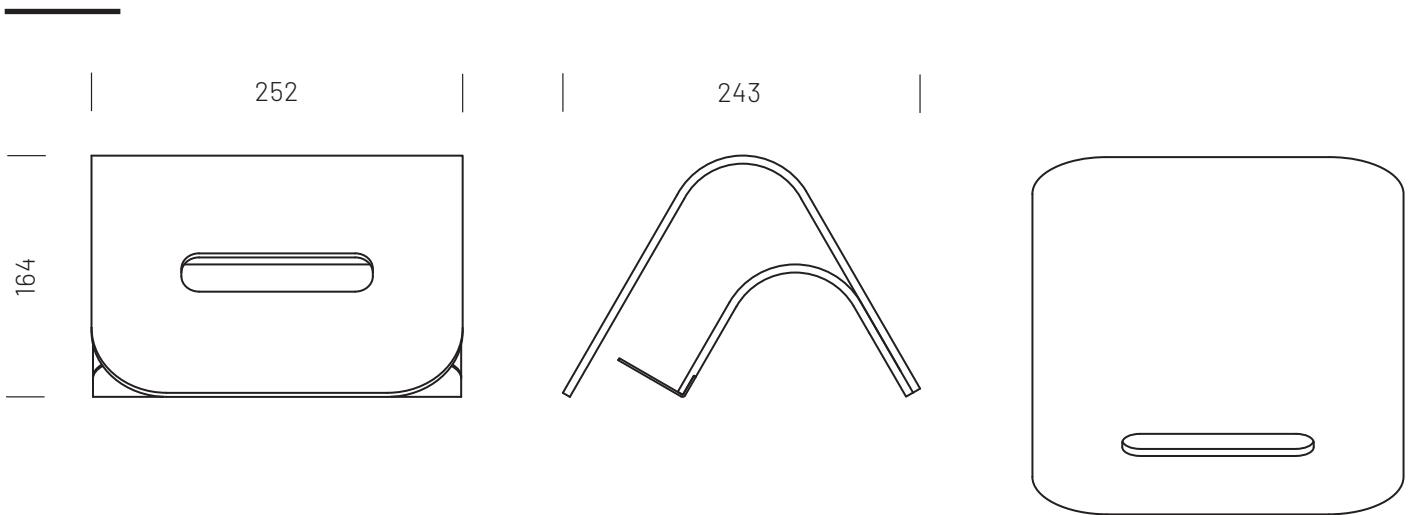

Designer  
**Anna Kovács**

PLYDESIGN

Nowadays, tissue boxes are entirely made of paper which is highly praiseworthy in terms of sustainability and recycling. The CADET dispenser prevents the tissue box from any unfortunate spillage and soaking as the plywood body embraces it, and the metal retaining bracket keeps it above the tabletop. Compared to peer tissue dispensers, CADET offers a more comfortable use due to the slantwise position of the aperture. The curvey shape of CADET tissue dispenser makes a cohesive look with the other members of the WAVE collection.

Dimensions:  
252 × 243 × 164 mm (L×W×H)  
Weight: 1 kg
